

BLOODBORNE PATHOGENS AND INFECTION CONTROL TRAINING FOR BODY ARTISTS

Course Certification

R 650-00
Online Course

Who is it for?

This course is for currently practicing and experienced body artists wishing to COMPLY with current standards and procedures according to the International and South African Occupational Health Standards.

About the course

The aim of this course is to provide you with an insight into the skill of Bloodborne Pathogens and Infection Control Standards

Tattoos, body piercings, and permanent cosmetics have seen a rise in popularity in recent years. Since puncturing or piercing of the skin is involved, more attention has been paid to training requirements for the technicians or artists performing these procedures in an effort to promote safety for both the clients and the artists. Many countries have passed guidelines or regulations governing tattooing, body piercing, and permanent cosmetics.

At a minimum, compliance with the Bloodborne Pathogens Standard is required. This standard regulates occupational exposures for workers whose jobs put them at a reasonable risk of coming into contact with blood and other potentially infectious materials. Yearly training is required to be in compliance with the standard.

How long does the course take?

This is an online course and can be completed in one day.

What's included?

All materials to enable you to successfully complete the training and course certification upon completion. SABATA has developed an online course to provide the training required by OSHA's Bloodborne Pathogens Standard. The course is targeted for anyone who has potential exposure to blood and other potentially infectious materials. There is some information provided that is specific to the tattoo and body piercing industry.

Material covered in the course includes definitions of bloodborne pathogens, modes of transmission, universal precautions, engineering and work practice controls, exposure control plans, and hepatitis B vaccinations.

When are the courses held?

The Blood Pathogens course can be booked throughout the year. You may find it convenient to have the course conducted at your body piercing studio. (In person training is charged at different rates, please inquire.)

Training may be delivered at any location within South Africa (t&c's).
